Stay cool in the shade.

Life is better in a pleasant atmosphere... STOBAG supplies textile awning systems of all shades. The complete range starts with simple balcony awnings. It goes on with every sort of folding and telescopic-arm, box and facade awning and awnings for conservatories. It peaks finally in refined sun-protection installations with automation, control systems and sensors.

In short: you can get everything you want for comfortable external shading from STOBAG. And a bit more.

We can also provide the solution to break-ins and vandalism: our proven folding security shutters provide protection for home and business premises.

We operate all over the world – but we do not compromise on Swiss Quality. Development, production and construction all in one hand – from us. STOBAG and its 350 staff produce over 120,000 installations a year. We are large enough to realise complex projects. And small enough to meet your individual needs.

A warm welcome to STOBAG!
